DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-13, 15-35, 37-56 are rejected under 35 U.S.C. 102(b) as being anticipated by Tucker et al (USPN 4,193,397). Tucker discloses an infusion apparatus that includes a medication reservoir, a carrier reservoir, a mixing chamber 88, a medication flow path, a carrier flow path, a medication pump system, and an outlet port. The device also includes a bolus port, a medication flow restrictor, and a carrier flow restrictor. These restrictors can be more or less restrictive than one another. The device also includes a power cell.

The mixing chamber 88 is considered to be a microfluidic chip because the device is small enough to be implantable and the portion 88 is very small and has fluid flowing through it.

Response to Arguments

2. Applicant's arguments filed 9/13/07 have been fully considered but they are not persuasive.

3. Applicant argues that Tucker does not teach that the mixing chamber is a microfluidic chip. Applicant does not specify that a microfluidic chip has any particular features, and therefore the mixing chamber of Tucker is considered to be a microfluidic chip. The mixing chamber of Tucker is sufficiently small to be considered a "microfluidic" component because it is a small portion of a device that is already small enough to be implantable. It is considered to be a chip because it is a small thin component.

4. Applicant argues that Tucker fails to teach a carrier. Applicant discloses on page 6 of the instant application that a carrier is typically saline or other sterile liquid. The basal infusate of Tucker is a sterile fluid since it is intended to be infused into the body, and it mixes with a second infusate to alter the concentration of the fluid to be delivered to the patient. Therefore, the basal infusate of Tucker meets the definition of a carrier fluid.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
